

COMBINED BRAKE & ACCELERATOR - FS2005

Braking with confidence and accelerating effortlessly with the FS2005 Combined Brake & Accelerator. Never before has a brake lever combined the function of such easy, smooth and safe acceleration. With its unique design, there is the opportunity to safely keep both hands on the steering wheel while maintaining accelerator control.

No more tedious mechanisms that hit your leg or interfere with the steering action. The FS2005 lever is knee airbag compatible.
