

COMBINED BRAKE & ACCELERATOR - FSK2005

The new FSK2005 Combined Brake & Ergonomic Accelerator offers a more functional activation of the accelerator for the user. The light action of the trigger allows for fatigue free acceleration and the unique design allows the stalk of the trigger to be pulled directly back to the steering wheel for smooth and progressive activation. With its unique design, there is the opportunity to safely keep both hands on the steering wheel while maintaining accelerator control. The FSK2005 lever is knee airbag compatible.

FEATURES

- Ergonomic & versatile accelerator trigger
- Smooth acceleration with minimal fatigue
- Acceleration safety cut-out mechanism
- Brake locking function reduces fatigue
- Easy height and angle adjustment
- Left and right hand versions
- Changeable end knob for greater customisation
- Colour options:
