

HIGH LEVEL MODIFICATIONS

The advanced range of products is suitable for those with very limited limb function. Braking can be provided with as little as 100grams of pressure and steering can be controlled with the new generation steering system from Fadiel that offers activation by a mini wheel, joystick, or foot steer unit. These systems can also be incorporated with voice command for activating secondary controls of the vehicle.

MINI-WHEEL FEATURES

- Smooth progressive steering
- Responsive and controlled
- Maintain original steering wheel aesthetics

CRADLE BRAKE FEATURES

- Combined power assisted brake and accelerator
- Fitted on left or right side of console or door

JOYSTICK FEATURES

- Smooth progressive steering, acceleration, and braking action
- Available in various configurations - steering/braking/acceleration

All systems are designed with full redundancy to ensure fail-safe operation
