

TRANSFER PLATFORM

The Transfer Platform provides a functional and effective solution for transferring to and from the seat of the vehicle. Built from high grade aluminium, the unit is capable of carrying 120kg. You can feel secure getting in and out of the vehicle. The steel fixation brackets are designed to fit discretely to the original seat rails. The unit folds compactly down and offers a profile thickness of 22mm ensuring sufficient space for door closure. Suitable for fitment on both driver and passenger side and compatible with most vehicle types.

FEATURES
